

2020 Hydrogen Landscape

Report brochure

Full report brochure

Table of contents (full report)

1. Key takeaways	2
2. Demand	5
3. End use sector highlights	15
4. Production landscape	24
5. What's next?	28

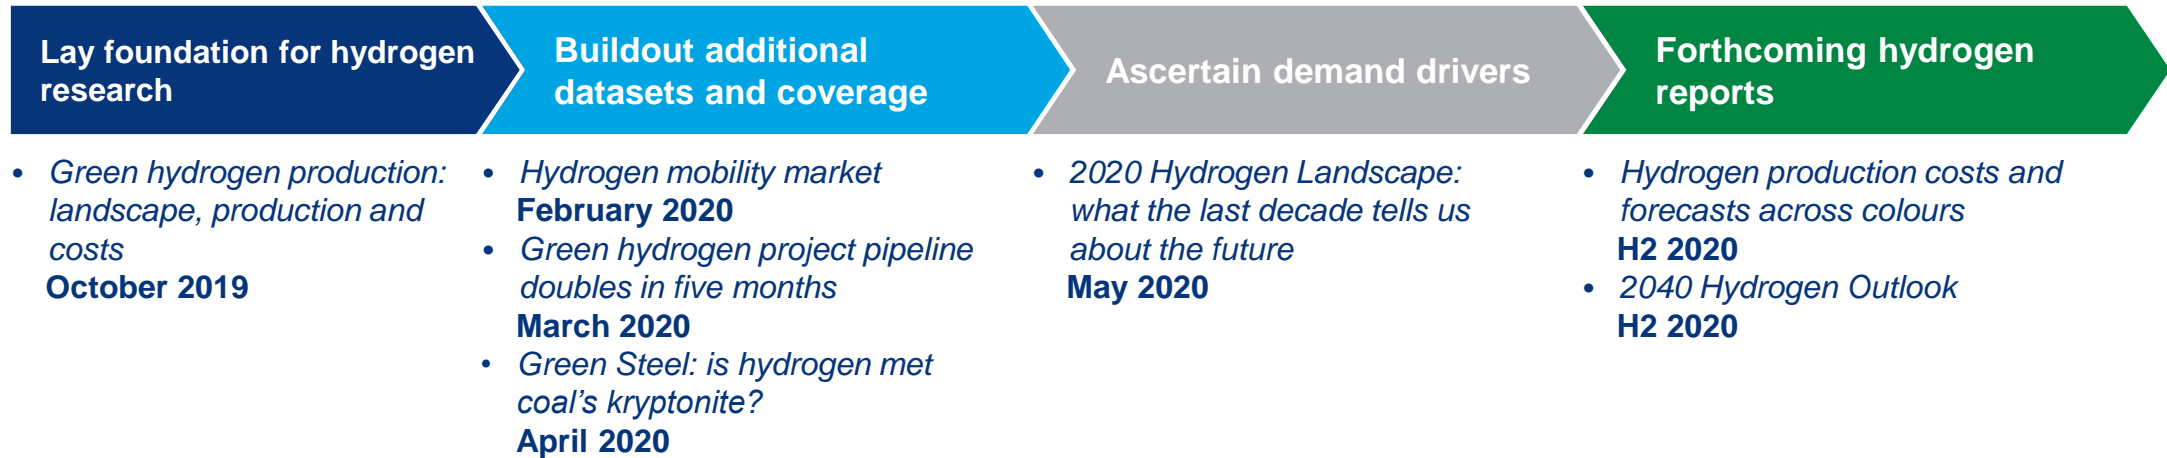

List of figures (full report)

- Hydrogen market size by country
- Global hydrogen demand by end use sector 2010 – 2020 (Million Metric Tons)
- 2020 global hydrogen demand by region and end use sector (Million Metric Tons)
- 2020 global hydrogen demand by region and end use sector (Million Metric Ton as % of total demand)
- 2020 top 15 global hydrogen markets by end use sector (Million Metric Tons)
- 2020 top 15 global hydrogen markets by end use sector (% of total demand)
- 2020 global hydrogen production by production source
- 2020 global hydrogen production by colour and region (% of total production)
- 2020 global hydrogen production for refineries by colour
- Global hydrogen demand, refineries and all other sectors 2010 – 2020 (Million Metric Tons)
- 2020 global top 15 countries for hydrogen demand for refineries (Million Metrics Tons)
- 2020 global hydrogen production for ammonia by colour
- Global hydrogen demand, ammonia and all other sectors 2010 – 2020 (Million Metric Tons)
- 2020 global top 15 countries for hydrogen demand for ammonia (Million Metrics Tons)
- 2020 global hydrogen production for methanol by colour
- Global hydrogen demand, methanol and all other sectors 2010 – 2020 (Million Metric Tons)
- Global hydrogen demand, methanol and all other sectors 2010 – 2020 (Million Metric Tons)
- 2020 global top 15 countries for hydrogen demand for methanol (Million Metrics Tons)
- Global hydrogen demand, other chemicals, metals, mobility and “other” 2010 – 2020 (Million Metric Tons)
- 2020 hydrogen demand for other chemicals by country (MT)
- 2020 hydrogen demand for metals by country (MT)
- 2020 hydrogen demand for metals by country (MT)
- 2020 hydrogen demand for “other” by country (MT)
- 2020 global hydrogen production, dedicated hydrogen facility vs on-site production
- 2020 refinery sector dedicated hydrogen facility vs on-site production hydrogen demand by country (%)
- Estimated 2020 global market share of dedicated hydrogen production
- Estimated 2020 global market share of dedicated hydrogen production by region (Million Metric Tons)
- Hydrogen facilities by country by color
- A vision of the “hydrogen economy” outlined in Australia’s National Hydrogen Roadmap

Hydrogen research at Wood Mackenzie

We will be publishing two more reports and datasets on hydrogen in 2020

We aim to provide the most complete proprietary datasets, analyses, cost models and insights on the hydrogen market as we accelerate our research on the hydrogen economy.

Report availability

This report is only available to subscribers of Wood Mackenzie's [Energy Transition Service](#).

The energy market is constantly evolving, and responding to each new development requires a deep understanding of fuel demand, the role of policy in fuel choices, and supply profiles across all fuels in the power and non-power sectors. The Energy Transition Service and Tool leverages our entire commodity analysis platform to deliver integrated energy market research underpinned by extensive expertise, proprietary models and robust market knowledge.

Email contactus@woodmac.com for demo requests and subscription pricing.
